SUSSEX COUNTY LUNATIC ASYLUM, HAYWARDS HEATH.

SIXTEENTH ANNUAL REPORT OF THE COMMITTEE OF VISITORS.

To Her Majesty's Justices of the Peace for the County of Sussex assembled in Quarter Sessions held at Lewes in and for the Eastern Division of the said County on Monday the 4th day of January, 1875, *and at Petworth in and for the Western Division of the said County on Thursday the 7th day of January,* 1875.

THE COMMITTEE OF VISITORS OF THE SUSSEX COUNTY ASYLUM appointed at the Epiphany Sessions in 1874, in making their sixteenth annual report, have pleasure in stating that the Asylum continues fully to maintain its high standard of efficiency and organisation, and during the past year nothing has occurred to disturb the harmonious working of its machinery in all its branches.

At the commencement of the year 1874, the number of inmates was 733, of which 342 were males and 391 females. There are now 358 males and 418 females, making a total of 776, and shewing an increase in the year of 43.

It appears from this report that there are 43 more patients in the Asylum than there were a year ago. In any inquiry into the causes which may have contributed to this increase, the Committee consider that the action of the Government in making an allowance of 4s. a week to the several unions, for

every pauper lunatic in the asylum, ought not to be lost sight of.

A much larger influx than usual, 200 in all, from the county of Sussex has come into the Asylum this year. The Government allowance makes it seemingly the interest of the Unions to transfer feeble and imbecile patients—who can perfectly be attended to in the Unions at a lower actual cost—to the Asylum. Any seeming saving thus effected, however, is not a real one, as it is simply made at the cost of the payer of county rates and of imperial taxes; while it is plain that if all harmless lunatics, imbeciles, or idiots who can be duly cared for out of the Asylum are to be sent to it, a larger increased expenditure must ere long be drawn from the county, not only for enlargement of the building, but for a greatly increased number of skilled, and consequently highly paid, attendants.

It is therefore greatly to the interest of the ratepayers generally that in any permanent scheme for their relief in the cost of the maintenance of lunatics which we have been led to believe is to be brought forward in the next session of Parliament, the defect above pointed out in the temporary plan of last year, which your Committee are convinced is a very real one, may be avoided, otherwise what is meant for relief may prove in the long run to be very much the reverse.

Of the 231 patients admitted during the year, 32 have been discharged on recovery, 6 as relieved, 1 not improved, and 30 have died, leaving a residuum on the admissions of 162.

The general total, however, of inmates has again been sensibly diminished by the large number of patients, amounting to 93, who, under Dr. Williams' skilful treatment, have been reported by him to the Committee as cured, and fit for discharge.

The general treatment of the patients, their occupations and amusements, have been continued as in preceding years. The farm and garden are mainly cultivated by lunatic labour; other male patients are engaged in tailoring, shoemaking, and matmaking, while the females are employed in the laundry, domestic offices, or in needlework, and few, who are able to work, remain idle.

The new Recreation Hall, opened on the first of November, 1873, has answered fully the objects for which it was built, affording to the patients amusement as well as reasonable sources of enjoyment, and at the same time a commodious room for visitors to the patients.

The attention of the Committee has been steadily directed towards keeping down the rate of maintenance as far as was consistent with the requisite comfort and care of the patients.

The cost per week for each patient has remained at 9s. 6d., a rate lower than that of the Asylums in the surrounding counties.

The Commissioners in Lunacy visited the Asylum in March last, and their highly satisfactory report will be found in the Appendix.

The Committee beg also to refer the Court to the annexed report of the Medical Superintendent, and to the statistical tables appended thereto, for fuller information of the details of the year just ended.

There is still marked progress in the cultivation and general improvement of the farm, and while its successful results keep down the cost of maintenance, it affords a healthy field of employment, and a valuable means of cure to the patients.

The high state of efficiency of the Asylum reflects the utmost credit upon the Medical Superintendent, Dr. Williams, and the Committee desire also to express their warm commen-

dation of the manner in which Dr. Greene and the other officers of the Asylum have performed their various duties during the year.

(Signed) JAMES H. SCLATER,
Chairman.

S. A. MORTLOCK,
Clerk of the Asylum

THE
MEDICAL SUPERINTENDENT'S
SIXTEENTH ANNUAL REPORT.

Sixteenth Annual Report.

THE Medical Superintendent has the honour to submit the Sixteenth Annual Report to the Committee of Visitors.

Numbers on the 31st Dec., 1873.

On the 31st December, 1873, the numbers in the Asylum were, Male 342, Female 391. Total 733.

Admissions.

The admissions during the year have been, Male 119, Female 118. Total 237.

Discharges.

The discharges during the year have been, Male 38, Female 54. Total 92.

Deaths.

The deaths during the same period have been, Male 64, Female 41. Total 105.

Mean Annual Population.

The mean population resident during the year has been, Male 348.1, Female 404.9. Mean average 753.

Numbers this day, 31st Dec., 1874.

The numbers in the Asylum this day (31st December, 1874) are, Male 359, Female 414. Total 773, being 40 more than last year.

Numerical results of the year.

The several numerical results are summed up in the first Table in Appendix A to this Report.

Annual per centages for 1874.

The Numerical Results of the year 1874 yield the following per centages :—

(*a.*) The Discharges (including the cases Relieved) are 37.9 per cent. on the admissions of the year. Excluding those cases Relieved, the per centage of Recoveries on the admissions stands at Male 24.4, Female 33.9. Average 22.1. On the mean number resident it is Male 8.4, Female 10. Average 9.1.

(*b.*) The mean Annual Mortality is Male 18.2, Female 10.1. Average 13.9. Mean Annual Mortality.

The Patients in the Asylum may be classified as follows :— Classification of Patients.

	M.	F.	T.
Chargeable to Unions and Boroughs in Sussex...	291	355	646
Chargeable to out County Unions and Boroughs	62	42	98
Private Patients	6	17	23
Total...	359	414	773

It will thus be seen that the number of Patients in the Asylum at the present time chargeable to Sussex is 291 Males and 355 Females—Total, 646. Numbers chargeable to Sussex.

The accommodation in the Asylum is for 376 Males and 440 Females—Total, 816. So that there are still 85 beds for Males and 85 beds for Females—Total, 170—available for lunatics chargeable to Sussex, should the number of admissions from the County continue to increase. Present accommodation.

The Admissions are unusually numerous, especially from Unions and Boroughs in Sussex, the only year since the opening of the Asylum in which they were exceeded being 1872, when 268 were admitted, but of these only 180 were from Sussex, the remainder being out-County cases. Admissions.

Last April, after the Chancellor of the Exchequer had brought forward his budget, one of the provisions of which was to allow Unions four shillings per week per patient in the Asylum, the Medical Superintendent ventured to predict in the medical papers that a large increase would take place in the admission of chronic and incurable and helpless cases, and that exchanges to the Unions would be greatly impeded. He also brought the matter forward in his Report to the Committee at their meeting in April, and they fully realised the danger. In many quarters, however, his facts were denied and his inferences disputed. It is with but a melancholy satisfaction that he ventures to point out that events have justified his most gloomy prognostications; for not only, as already stated, have the admissions much exceeded the average, but out of between thirty and forty chronic and harmless cases he looked out, and, with the sanction of the Committee, recommended to certain of the Boards of Guardians for discharge to the workhouses, only thirteen were accepted, whereas in former years he had no difficulty in getting as many such cases as he could recommend removed. During the whole course of his connection with Asylums, now ranging over many years, he never remembers to have seen such a set of miserable, hopeless, helpless cases as comprise the admissions for 1874. Of the whole 237, only 44 could be deemed at all curable, and 33 were on admission so enfeebled by disease, that they died before the year had expired; and to prove how unfavourably this contrasts with former years, a glance at Table IV. will show that the highest number in any previous year of one year's admissions dying within the year was 18 in 1873, 11 in 1859 being the next highest. Moreover, 28 were suffering from Progressive Paralysis, or Brain Softening, and 14 were Epileptics.

Deaths. The deaths have been unusually numerous, and the percen-

tage on the average numbers resident is as high as 13.9. A reference to Table V. of the Appendix will, however, show that all, with scarcely an exception, were due to some organic incurable disease, and that 75 out of the whole number of 105, died either from organic Brain Disease (17), Progressive Paralysis (19), Phthisis (18), Heart Disease (11), or decay of old age (10), whilst 33 were upwards of 60 years of age. Moreover, many of the new cases have been only brought here to die within a few days or weeks of admission. Thus 1 died within a week of admission, 11 within a month, and 16 before the year had expired.

There has been no case of sudden or violent death, no suicide, and no epidemic, and the increased mortality can only be accounted for by the fact that the severe and changeable weather experienced during the year has carried off the large residuum of incurable cases left over from previous mild winters. There are, however, a large number left, and it is to be feared that the mortality of the coming year will equal that of the past.

Discharges.

The discharges have also been influenced by the unfavourable nature of the admissions, and are below the average. They may be arranged under three heads:—

1. Those recovered, viz., 69.
2. Those relieved and discharged to care of their friends, viz., 8.
3. Those relieved and discharged to the Union houses, viz. 13.

A considerably larger number might have been discharged under the last heading, but that, as already stated, the majority of Unions decline to receive them, now that Government allows a capitation grant for all lunatics in the Asylum.

General History of the Year.

The general history of the Asylum for the year has been unusually uneventful, and happy indeed is the Asylum that

has no history. There has been no accident of any sort beyond the most trivial, and no inquest has been considered necessary. Only one patient escaped, and he returned of his own accord. The general health of the inmates has been good, and there has been no troublesome epidemic to contend with.

Commissioners in Lunacy.

The Commissioners in Lunacy visited the Asylum on March 30th and 31st, and their report, which is of a highly satisfactory nature, will be found published further on.

Birth of a Child.

On April 16th, Martha Hilton, a married woman, admitted shortly before with Epileptic insanity, gave birth to a male child; both mother and child did well.

Theatre.

The Theatre erected in connection with the new Recreation Hall was opened on the 6th of April with a theatrical performance given by the gentlemen amateurs of the "West End Amateur Dramatic Society," assisted by professional actresses.

The Brighton "Nondescripts" and the "Lewes Amateur Dramatic Society" have also given entertainments of a first-class nature, which have been much appreciated by the patients, and the warm thanks of the Medical Superintendent are due to the various ladies and gentlemen who have so kindly and heartily given their services. Besides these, professionals, too numerous to detail, have been engaged from time to time as opportunity served. Altogether the theatre has been a great success, and its being fixed and always ready for use has reduced the inconvenience and trouble of such entertainments to a minimum.

New Work.

The alterations, additions, and improvements undertaken and completed during the past year are as follows :—

Fitting and furnishing the theatre with appropriate scenery, machinery, &c., &c.

Slating and plastering all the bedrooms in the third story on both sides the house, and painting the same.

Erecting an additional tank on each side the asylum to contain 3,000 gallons of water as a reservoir in case of fire occurring in the roof.

Building new fire engine house.

Draining infirmary terrace.

Improving means of extinguishing fire generally throughout the asylum.

Erecting two new cottages for artisans.

Painting and decorating centre hall and passages.

Building third room for Senior Assistant Medical Officer.

Furnishing, papering, &c., new suites of rooms for Junior Assistant Medical Officer, Housekeeper, and Kitchen Servants.

Conclusion.

It is the Medical Superintendent's pleasing duty again to have to recognise the invariable support he has received from all the officers during the year, and the assiduity with which they have carried out his wishes and performed their respective duties. The Attendants, Nurses, and Artisans, with but few exceptions, have conducted themselves with propriety, and performed their trying duties with zeal. To the Committee of Visitors he may be permitted to say—and this is no mere hyperbole—that he has not language with which to express his sense of their uniform kindness and consideration, so great is his obligation to them.

S. W. D. WILLIAMS, M.D.,
Medical Superintendent.

Haywards Heath,
31st December, 1874.

THE CHAPLAIN'S SIXTEENTH ANNUAL REPORT.

Sixteenth Annual Report.

THE Chaplain desires to lay before the Committee his report for the past year.

Sunday Services.

The usual services on the Sundays, and those on Christmas Day and Good Friday, have been performed in the Chapel and in the Wards.

Administration of Holy Communion.

Holy Communion has been administered in the Chapel, and to the sick from time to time as usual.

Daily Prayers.

Portions of Holy Scripture and Morning Prayers have been read daily in the dining halls after the patients' breakfast.

Library.

The library for the household, and the books in the wards have continued to afford interest and amusement to many inmates of the institution.

Visits, &c.

The Chaplain has visited the Wards, Workshops, &c., on the prescribed days, and on other occasions when necessary.

Commemoration.

The Commemoration Festival was kept as usual on July 25th. The sermon was preached by the Rev. H. Campion, M.A., Rector of Westmeston.

Burials.

69 burials and 37 removals have taken place during the year.

Conclusion.

The Chaplain desires to express his sense of the support afforded him by the members of the staff in the execution of his various duties in the Asylum.

(Signed) THOMAS E. CRALLAN, M.A.
Chaplain.

Haywards Heath, December 31st., 1874.

METEOROLOGICAL REPORT.

The year 1874 was altogether an average year as to rainfall and temperature, but the first six months were unusually dry, while this drought was compensated by the rainfall of September, and the two following months.

September was the wettest, and May the driest month in the year. The greatest cold took place in December, when the minimum thermometer on the grass recorded 11.3.

The greatest heat was recorded on July 19th, viz., 149 deg.

The greatest rainfall took place on February 26th, when it amounted to 1.45 inches.

The usual table is annexed.

(Signed) THOMAS E. CRALLAN.

REPORT BY THE VISITING COMMISSIONERS IN LUNACY.

Sussex County Asylum, Haywards Heath,
31*st March*, 1874.

The inspection of this Asylum occupied us yesterday and this forenoon. The patients to-day are 733, of whom 340 are males, 393 are females; of the former 7, and of the latter 14, belong to the private class.

Those chargeable to Sussex and Unions in the County are 637, and 77 are out County patients. The maintenance charged for patients chargeable to the County has been reduced from 9s. 8d. to 9s. 6d.; the other paupers are received for 14s. weekly, and private patients pay 16s. From the statutory records we learn that 118 males, and 122 females, together 240 patients, have been admitted since our colleagues were here in January, 1873. That during the same interval 132 have been discharged in the proportion of 51 men to 81 women, and that 59 males and 32 females, a total of 91, have died. Of the discharged, of both sexes, 87 had, it appears, previously recovered from insanity, and 36 were well enough to return to the care of their friends. During the past four years Dr. Williams has been enabled to relieve this Asylum from the charge of 100 chronic cases by making suitable arrangements for them at their homes, and he assures us that no mischief has in any case resulted. Of the whole number six have been returned to the Asylum. During our inspection we saw every patient whose name

appears in the books of the Asylum, except a male private patient and a pauper boy—both these were absent on leave —the boy having been removed because he was attacked by measles. The occupants of both divisions were in their usual excellent order, no violence was displayed by any, and the quiet of the wards was very remarkable. In the Infirmaries we found a large proportion of old people. On the male side 5 persons were there in bed; in the female division as many as 18. In the other wards there were in bed 2 males.

The general paralytics and epileptics are a considerable number. Of the seventy deaths which took place in 1873, Dr. Williams informed us that 36 were attributable to general paralysis and phthisis; and of the 91 who have died since the last visit, 19 are recorded as having died of general paralysis; 10 from other brain disease; 15 from diseases of the heart; 10 from epilepsy; 10 from age; and 8 from exhaustion following mania or melancholia. Inquests were held in 2 cases; one in that of an epileptic who was found dead in bed; the second on a man removed from Brighton in a moribund condition, who died 12 hours after admission. The post-mortem examinations have been 36 only. Objections by the relatives of the other deceased patients have been the obstacle where no examination took place. On inquiry into the number of attendants, we are told by the Medical Superintendent that they are in the proportion of 1 to about 15 on the female side, and of 1 to 14½ in the male division—the men make up a Musical Band of eight, led by the person who acts as Organist and Schoolmaster, and all seem to discharge their various duties in a satisfactory manner.

In reference to the epileptic patients, 78 in number, we are glad to report there is now a special night attendant in

each division for them, and though the epileptic wards are not, from their structure, well adapted for general supervision, or capable of accommodating all of the class referred to on the ground floor, still the arrangements lately made will be a great protection to those patients. The practice of Packing in Wet Sheets is maintained, and Dr. Williams says with beneficial results. Five males have been so treated on 18 occasions, and 14 women in 63 instances, usually for an hour at a time. There is no record of resort to restraint, but 12 men have been 16 times secluded, and 11 females on 46 occasions—none of either sex for a prolonged period—although on the second day of our visit the weather detained the patients in-doors; the wards were, in consequence of their good ventilation, and the cleanliness of the patients, quite free from any offensive smell. Everywhere we found the beds and bedding in order, and in every part of the building a prevalence of comfort and proper discipline. We did not finish our other work sufficiently early to see the men at their dinner, but were present in the Women's Hall, when about 300 sat down to table. The meal consisted of Australian meat with batter and sage and onions; each portion was ample in quantity and very palatable. The new Recreation Hall has been used for some entertainments, but is to be formally opened within a few days by a Theatrical Performance, for which it is well adapted, by the erection of a fixed stage and proscenium, with dressing rooms underneath for the actors. The other alterations and improvements at this Asylum comprise a third room for the Senior Assistant Officer, and further accommodation for the Junior, also for the Housekeeper, the enlargement of ward No. 6 on the female side, the provision of two cottages for attendants, and the erection of a detached meat larder. We may add that the female general bath

room is made more complete by supply of curtains for each bath, and that certain wards on the ground floor have been much improved by the disuse of rooms underneath for the cleaning of vegetables. The total number of vacant beds in this Asylum is now 83, viz., 36 for men and 47 for women. The County patients do not appear to increase in number. It is with much satisfaction we notice that the salary of the Senior Assistant Medical Officer has been raised. The Visitors have also divided the office of Clerk and Steward and appointed a Storekeeper to perform the duties of the latter.

We found all the wards amply supplied with the means of in-door amusements, and the occupation of the patients seems to be successfully carried out, a large number being employed on the land, in the laundry, and in various trades. As many as 520 of both sexes attend chapel on Sundays, and 550 on week-days; 30 or thereabouts of each sex attend the Asylum School. The medical and other records are very carefully kept, and we have again much pleasure in stating our opinion of the efficient way in which this Asylum is conducted.

CHARLES PALMER PHILLIPS, } Commissioners
JAMES WILKES, } in Lunacy.

APPENDIX

CONTAINING THE

TABLES OF THE MEDICO-PSYCHOLOGICAL ASSOCIATION, &c.

The Medical Superintendent desires to acknowledge the services rendered to him by the Clerk of the Asylum (Mr. S. A. Mortlock) in the compilation of these Tables.

CONTENTS OF APPENDIX.
